Professional Experience

IATMI (Ikatan Ahli Teknik Perminyakan Indonesia) - Software Engineer Jul 2026 – Present
Professional association of Indonesian petroleum engineering experts

- Gathered requirements across divisions and mapped business flows to redesign website UX for Symposium IATMI XVIII 2026, a national petroleum engineering symposium attended by industry professionals.
- Managed and troubleshoot production server infrastructure independently: mail server, web server, and CI/CD pipeline.
- Delivered full-stack implementation using React (FE) and Node.js/Express (BE).

Politeknik Caltex Riau - Software Engineer Mar 2026 – Jun 2026

- Architected and delivered a production multi-role academic recognition system for Politeknik Caltex Riau (live at rpl.pocari.id), serving 5 distinct user roles – each with tailored dashboards and workflows.
- Owned end-to-end delivery as sole developer: requirements gathering, system design, full-stack implementation, deployment, and user documentation.
- Leveraged AI-augmented development workflow with Claude Code, GitHub Copilot, and Google Antigravity to compress a typical multi-developer project into a solo build, while maintaining clean architecture and code quality.

PT. Kilang Pertamina Internasional RU II Dumai - Software Engineer Intern Oct 2024 – Jan 2025
State-owned oil & gas refinery company, one of the largest refineries in Indonesia

- Architected and delivered Sistem Informasi Mahasiswa Magang IT (IT Internship Management System) end-to-end using ASP.NET Core 8, digitising 100% of intern intake records and eliminating manual paper-based tracking.
- Applied Pertamina's proprietary clean-code architecture template (Pertamina Solution Template) to ensure maintainable, production-grade codebase aligned with company engineering standards.
- Onboarded and documented system handover to the IT team, enabling seamless adoption with zero post-deployment support tickets.

Assist.id - Backend Engineer Intern Jul 2021 – Nov 2021
Hospital Management Information System (HMIS) SaaS platform serving healthcare facilities across Indonesia

- Maintained and enhanced the official Assist.id marketing website, improving page reliability and content accuracy.
- Engineered a RESTful API for the upcoming mobile application using the MERN stack.

Education

Politeknik Caltex Riau - Bachelor of Information System Sep 2022 – Oct 2026

- **CGPA: 3.94/4.00**
- Recipient of Beasiswa Prestasi Pemerintah Provinsi Riau, 2023 - awarded to high-achieving students.

Projects & Achievements

Multimodal AI Application with Qwen2.5-VL-12B Sep 2025 – Dec 2025
Python · Qwen2.5-VL-12B · Gradio · Transformers · PyTorch

- Developed and deployed a local Vision-Language Model (VLM) application using Qwen2.5-VL-12B for image captioning and object localization tasks through an interactive Gradio interface.
- Engineered an end-to-end inference pipeline covering image preprocessing, multimodal prompting, model inference, and result visualization for real-time image understanding.
- Evaluated the model's capability to generate descriptive image captions and identify object locations from natural language queries, demonstrating practical multimodal AI deployment on local infrastructure.

Expo Technopreneurship Website Nov 2025 – Dec 2025
Full-stack · Laravel, Vue.js, Tailwind CSS, MySQL

- Architected and delivered end-to-end a public-facing Technopreneurship Expo platform for Politeknik Caltex Riau – used by 20+ tenant teams and recorded over Rp. 5 mil in live transactions during the event.
- Spearheaded sole development from requirements gathering, system design, full-stack development, VPS hosting, to live demo presentation to PCR academic community – adopted as the official platform to be reused year-over-year.

Dashboard Sistem Penjaminan Mutu Internal PCR Sep 2024 – Feb 2026
Data & BI · Microsoft Power BI, DAX, REST API

- Built a Power BI dashboard for Internal Quality Assurance (SPMI) at Politeknik Caltex Riau, pulling data directly from the institution's SPMI API through an ETL pipeline and structured around the five PPEPP cycle stages.
- Applied User-Centered Design across three iterations with stakeholders, raising the System Usability Scale score from 78.7 to 83.72, with all tested components passing data validation against the source.
- First-author paper: "Development of a User-Centered Business Intelligence Dashboard to Support the PPEPP Quality Assurance Framework in Higher Education", TEKNOSI 12(2), 377–385. doi: [10.25077/TEKNOSI.v12i2.2026.377-385](#)

Logbook Information System <i>Full-stack · Laravel, MySQL</i> • Built a web-based laboratory logbook system for Politeknik Caltex Riau that replaced a fully manual paper process • Conducted end-to-end delivery: requirements gathering, ERD design, full-stack development, user manual writing, and ongoing maintenance	Nov 2023 – Aug 2024
JTI Expo Website <i>Backend Developer · Laravel, MySQL, VPS, cPanel</i> • Developed and deployed an admin panel and product catalogue website for the Riau Government Exhibition, used live during the official provincial expo event to showcase Politeknik Caltex Riau's featured projects. • Self-hosted the application on a VPS, managing deployment pipeline and uptime independently.	Jun 2024 – Jul 2024
MoJalan – Tour Guide Marketplace App <i>Full-stack · Figma, Android Studio, Kotlin</i> • Designed the complete UI/UX on Figma and implemented the design in Android Studio for MoJalan, a platform connecting tourists with local tour guides.	April 2024 – Jul 2024
Fast Food Classification (CNN) <i>Data & ML · Python, TensorFlow/Keras, React</i> • Built and trained a Convolutional Neural Network (CNN) model for fast food image classification as a data mining project, then deployed it on a React web interface for end-user interaction.	April 2024 – Jul 2024
1st Place in UI/UX Design Competition 2025 National-level UI/UX competition organized by PCR. Competed against participants from universities across Indonesia.	
Hackathon Hackfest 2024 – Google Developer Student Club • Competed in Google GDSC Hackathon focused on SDGs	Mar 2024 – Mar 2024

ORGANIZATIONAL EXPERIENCE

HIMASISTIFO (Information System Student Association) <i>Head of Research & Technology Department (RISTEK) · Politeknik Caltex Riau</i> • Led a department of 4 members, authored the annual Research & Technology roadmap, and served as Steering Committee for HI-TECH 7 – a national-level student tech competition. • Previously (Sep 2023–Sep 2024) as Member: spearheaded Weekend Belajar, a weekly tutoring programme for incoming students, and served as Chief Executive of HI-TECH 6.	Sep 2023 – Sep 2025
PKM UI/UX Workshop Mentor <i>Community Service (Pengabdian Kepada Masyarakat) · SMKN 7 & SMKS Muhammadiyah 2 Pekanbaru</i> • Mentored vocational high school students in fundamental UI design using Figma across two separate community outreach programmes, assessed student assignments and provided individual feedback.	Oct 2023 & May 2024

Skills	
Languages: Bahasa Indonesia (Native), English (Professional Proficiency). Programming Languages: PHP, JavaScript, TypeScript, Java, Kotlin, C#, Python, SQL, HTML/CSS. Technologies: Laravel, CodeIgniter, React, Node.js, Vue.js, Next.js, Express, ASP.NET Core 8, Android Studio Tools & Platforms: Git/GitHub, Figma, Postman, VPS Deployment, Google Cloud, Docker, Jupyter Notebook, Power BI Hard Skills: Programming, Version Control, UI/UX Principals, Debugging, Design Soft Skills: Fast-learner, Team Work, Critical Thinking, Quick Adaption, Problem Solving AI-Assisted Development: Claude Code, Copilot, Antigravity, Codex.
